“ Topics in Japanese Geography I ”

Google / Ingress I - Beyond Google Earth. Google Earth has changed the educational method of geography. It is a very useful visualization tool, but only for the cyber world. Not for real world. Google has known this demerit on Google Earth, so they have launched the Ingress system on the mobile phone in 2012. The Ingress can make the chances for outdoor actives in the city. This course will explain the state of the Ingress in Japan for geospatial education and tourism.

- Period
1st seasons: 2015 Sep - 2016 Jan (15 weeks)
2nd seasons: 2016 Apr - 2016 Jul (15 weeks)
